## DUXER Automatic Doors

**DXR-300**

**DUXER**

German  
**DUNKER MOTOR**

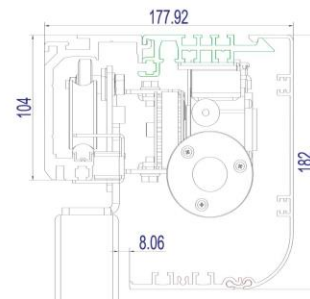

Microcomputer intelligent  
control system (32bits)

JAPAN Bando bell

Hanger with  
JAPAN NSK  
bearing

### Technical data:

Technical data:	Single leaf	Double leaf
Power supply:	AC220V~250V, 50HZ/60Hz	
Motor power:	100W	
Door panel weight:	<250KG×1	<150KG×2
Hold open time:	1~25S	

### Features:

- Adopt original brushed motor from Dunkermotor, Germany, Bando bell and NSK bearing from Japan, make the system quiet and durable.
- Optex sensor from Japan, make the system much safe.
- Breakthrough design --- auto-reverse during the whole process of opening and closing when encountering small resistance, much improve the safety.
- Design fire alarm interface, safe and reliable.
- Low energy consumption, more than 90% of the electrical energy is converted into mechanical energy when the system is running, basically motor won't become hot, extend service life.
- The track is embedded with rubber, make the running no noise.
- Beautiful and useful cover design for easy maintenance.
- Advanced handset to adjust the speed, hold open time etc.
